

Come and see ideas for a new 6th Avenue

The 6th Avenue Upgrade Project has reached an important milestone. The draft Design Study Report (DSR) is ready for review and comment. The DSR contains not only the results of research and observation of the current road corridor, but also shows design ideas and alternatives which may go forward through the more detailed full design process and on to construction.

Besides new pavement, curb, and storm drainage for the street, the DSR shows possibilities for traffic calming features, sidewalks, landscaping, vehicle turnaround at the west end of the street, parking and gateway elements for Creekside Park. The project team wants you to look over their work and give them your feedback.

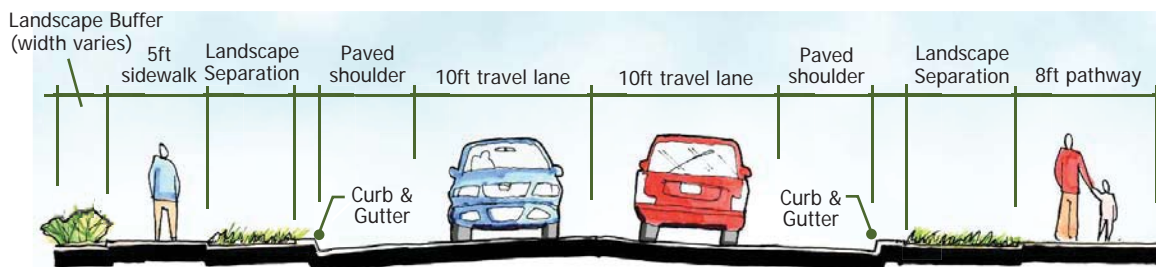

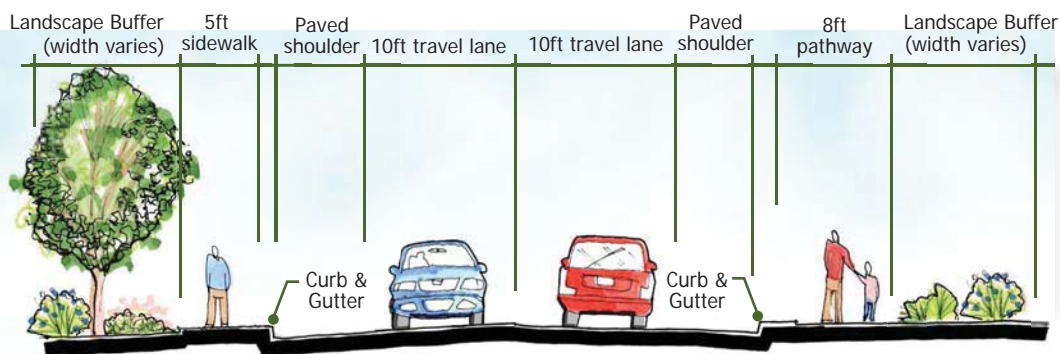

Please attend the project Open House Meeting (details on reverse), take a look at the plans, ask questions and give us your comments. We welcome your help in making a street that better serves the residents, school, park, and the traveling public.

Questions? Comments? Please contact us.
